What to do if you are a close contact to a COVID-19 case

Public Health
IN THE 406

Are you vaccinated against COVID-19?

NO

YES

Are you up to date on vaccination, including a booster dose if recommended?

Did you have COVID-19 in the past 90 days, diagnosed with a positive test result?

NO

NO

YES

YES

1. Stay home and quarantine for **5 days** following your exposure

2. Get tested at least 5 days after your last exposure

3. After that, wear a mask around others for 5 more days (days 6-10)

4. If you get sick, get tested and stay home

1. Wear a mask around others for **10 days** following your exposure

2. Get tested at least 5 days after your last exposure

3. If you get sick, get tested and stay home

Please note that these are CDC quarantine recommendations. Application of the recommendations must comply with state law. Check with the local health department for quarantine recommendations in your area.
